N-O Pro™

Clinical Strength Nitric Oxide

The patented technology in N-O Pro™ is the result of over a decade of research and development. It is the first and only system to safely generate an independent source of physiological nitric oxide (N-O) for systemic restoration. Clinical strength N-O Pro™ is designed for clinical use and is distributed exclusively through healthcare professionals.

Nitric Oxide and the Body

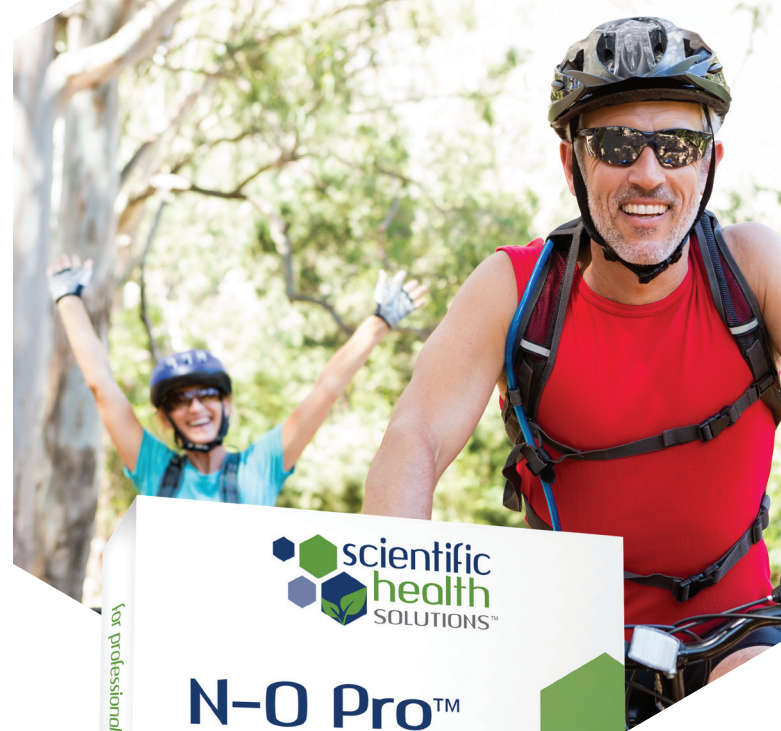

Our cardiovascular system relies on Nitric Oxide. So, no matter your age or stage of life, N-O is critical to your health. This essential molecule signals our blood vessels to relax and expand, creating greater efficiency in the body, greater nutrient delivery, greater oxygenation and so on to every system, organ and tissue in the body. It also supports healthy blood pressure. The point is that N-O is truly linked to everything we do and every breath we take.

If we dive even deeper, we'll see that Nitric Oxide is tied closely to endothelial function. The endothelium is the tissue that forms a single layer of cells lining our blood vessels and heart.

Growing evidence suggests that promoting optimal endothelial function is associated with increased cardiovascular health. N-O helps keep the endothelium healthy; a healthy endothelium helps produce more N-O. Maintaining the proper functioning of this cycle is important for those who want to achieve their personal best at any age.

Supplement Facts

Serving Size 1 Tablet
Servings Per Container 60

	Amount Per Serving	% DV
Vitamin C (as magnesium ascorbate and ascorbic acid)	100 mg	167%
Vitamin B12 (as methylcobalamin)	50 mcg	833%
Folate (as (6S)-5-Methyltetrahydrofolic acid, glucosamine salt)	400 mcg	100%
Proprietary Nitric Oxide Blend	425 mg	*
Beet Root Powder (root), Hawthorn Berry Extract (berry), L-Citrulline, Sodium Nitrite		

*Daily Value (DV) not established.

Other ingredients: Mannitol, modified cellulose, xylitol, natural flavors, magnesium vegetable stearate, silica, and stevia.

Suggested Use: You may take up to 2 tablets per day during the restoration-loading phase. Take each tablet 12 hours apart. After 30-45 days, take only one tablet daily. Place one tablet in your mouth, dissolve or chew, and swallow. Do not place under tongue or swallow whole. Hydrate before and after taking to avoid mouth sensitivity.

These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure or prevent any disease.

N-O Pro™ Clinical Trial

Study conducted by world-renowned physician Ernst R. Schwarz, MD, PhD, FESC, FACC, FSCAI, Medical Director of the Cardiac Support Program and Co-Director of Cardiac Transplantation at Cedars-Sinai on **N-O Pro™ to determine the effects of oral nitric oxide (N-O) supplementation** on blood pressure levels and quality of life. The subjects of the study had blood pressure levels that were elevated but within the acceptable range of normal.

THE STUDY

Using the Gold Standard in Clinical Research:

Randomized, Double-blinded, and Placebo-controlled methodology

29

29 adults were split into two groups

- Subjects ranged in age from 39 to 43
- Were not taking any medication for blood pressure
- Did not have hypertension

17

17 adults took a N-O Pro™ tablet twice daily

12

12 adults took a placebo tablet twice daily

30 Days Pass

Before and after the 30-day trial period, subjects were tested for blood pressure levels and functional capacity using a 6 minute walk test.

THE RESULTS

Blood Pressure

N-O Pro™ Group
Positive results:

Placebo Group
Unchanged results:

Initial Test	Systolic	Initial Test
Final Test: 12 point drop		Final Test: No Change
Initial Test	Diastolic	Initial Test
6 point drop		No Change

This study strongly suggests that effective N-O supplementation may lower blood pressure in patients with prehypertension and might be beneficial as a routine supplementation for cardiovascular health.

How N-O Impacts the Body

- Patented Technology & Clinically Proven
- Non L-Arginine delivery of Nitric Oxide
- Supports healthy blood pressure levels
- Helps to regulate and fine-tune cardiac function
- Dilates arteries for healthy blood flow
- Increases circulation throughout the body
- Improves natural energy and stamina
- Generates authentic N-O gas
- Helps restore the body's own N-O production
