NEO40 DAILY VS. NEO40 PROFESSIONAL

CHECK OUT THIS QUICK GUIDE TO SEE WHICH NEO40 IS RIGHT FOR YOU.

Neo40 is a nitric oxide solution backed by 15 years of science research: 6 issued US patents, 2 international patents, and 6 more pending patents worldwide.

THE ONLY TECHNOLOGY OF IT'S KIND - IN THE WORLD.

As the only technology in the world to deliver authentic Nitric Oxide gas, both Neo40 Daily and Neo40 Professional work through a unique 2-phase system.

Both Neo40 Daily and Neo40 Professional are safe and effective, based on the gold standard of clinical trials — 6 randomized, placebo-controlled studies published in peer reviewed medical and scientific journals.

World-renowned Cardiologist Dr. Ernst Schwartz recently led a research study on Neo40 Daily that strongly suggests how effective N-O supplementation may lower blood pressure in patients with prehypertension and might be beneficial as a routine supplementation for cardiovascular health.

PHASE 1

- As the Neo40 lozenge dissolves, it generates and liberates Nitric Oxide gas within the body.

PHASE 2

- The ingredients and co-factors within Neo40 re-couple the Nitric Oxide Synthase (NOS) enzyme, which normally converts L-arginine into NO.
- Thanks to a number of factors within your body, NOS often becomes dysfunctional and can no longer convert L-arginine to Nitric Oxide, which is why individuals become Nitric Oxide deficient. **Within 4 hours of using Neo40, NOS becomes functional again and stimulates a 15% improvement of conversion to Nitric Oxide.**

humann

NEO40 DAILY

- Provides daily Nitric Oxide support & restores physiological Nitric Oxide production to help support the body's own ability to make NO.
- In a 24-hour period, Neo40 Daily fixes the enzyme that normally makes N-O in the lining of the blood vessels.

NEO40 PROFESSIONAL

- **Provides 20% more Nitric Oxide** production in each lozenge **compared to Neo40 Daily** for people under the care of a health care practitioner.
- Many people have a mutation that inhibits the ability to support N-O production. **Neo40 Pro contains methylated tetrahydrofolate to overcome this problem**, yet because of each person's complex biochemistry, physicians and licensed healthcare practitioners are necessary to administer and monitor Neo40 Pro.

NEO40 PROFESSIONAL PROVIDES

20% MORE NITRIC OXIDE

COMPARED TO NEO40 DAILY
